

[_____](#). The Environmental Sustainability Strategy is available from the following link:

we are doing to meet these targets.

Please help us to reduce the University's impact of the environment, and become a more sustainable organisation by following the guidance below.

8.1 Green Impact

Green Impact is an environmental accreditation scheme that brings together staff and students across the University to play an active role in improving the sustainable practices of their office, building or

Please take particular care to switch things off at the weekend, and especially if you are away from your desk for a longer period such as during the Christmas and Easter closures.

8.3 Heating

The heating at London Metropolitan University is controlled by a Building Management System. This measures the outside temperature and automatically turns on the heating when the external temperatures drop below a set point. The heating is turned off when the building reaches the temperature set out in our [Space Temperature Policy](#) which is 19 - 21°C.
